

Fiber Construction Timeline

1. Infrastructure → 2. Vaults → 3. Run Fiber → 4. NID installs → 5. In-home installs → 6. Go Live!

- **Ready, Set, Go!** Sign the service agreement, mark your irrigation and propane lines, check your email and phone messages for scheduling information throughout the summer, and clear a path for equipment. May – June, connections will go live in the Chewuch area.
- **The Contractors** - Cannon does the infrastructure, Zero DB does the fiber runs, and Paramount does the end-user connections. Crews will follow each other, working simultaneously to complete the fiber build on time and to code.
- **Be cool** - DO NOT walk or drive into active work areas. Don't be that person that ends up in a safety training video!

OCEC Annual Meeting
When: Monday, May 11th, 7:00 PM – 8:00 PM
Where: Winthrop Barn

Tech Corner
What is Forrest Gump's Password?
1Forrest1!

Password must contain a symbol, a number, an emotional arc, a centralized theme, a big set piece, a male lead struggling with inner demons, and a strong female character.
