

Fiber Construction Timeline

1. Infrastructure → 2. Vaults → 3. Run Fiber → 4. NID installs → 5. In-home installs → 6. Go Live!

Happening Now - Router installs for indoor activation will begin next week. Unfortunately, (or fortunately!) some aspects of the build are moving faster than others. While the indoor parts will all be connected, we can't fire up the network just yet. It's coming ... we promise!

Feedback – If you have feedback to give to the Cannon work crews – kudos or complaints - please email Methowfiber@Teamcannon.com.

Updated Timeline - Please see the link to the Updated Timeline, June 2026, for a high-level overview of the build timeline

Digital Discovery Series

June 23, 5:30pm – 7pm, Economic Alliance Office, Omak.
